

Delta Rock

Delta Rock

Delta Rock Company was established in 2004. It has continuous manufacturing experience since 1984. Delta Rock is a growing company specialising in manufacturing and exporting mining machinery parts, especially rock drills and drill rigs. Delta Rock is located in Ankara-Ostim organised industrial zone.

Delta Rock has more than 20 CNC machine systems and machine benches in its factory. Moreover, the quality control team are experienced engineers who develop and implement reverse engineering. In addition, many technicians and repair service agents work as a team to assist the engineers.

Delta Rock Company not only specialises in reverse engineering, but also in the repair and assembly of rock drills. The technical team, which has 20 years of experience in the assembly process, works meticulously to operate and deliver the rock drill. The test of the rock drill is also carried out in the factory.

Delta Rock Company, with 20 years of experience, is known for its quality and continues to expand its production capacity without compromising on quality.

The experienced marketing department and foreign trade staff are available 24/7 for valued customers and work to fulfil the demands in the best way possible.

Delta Rock
